Nature and Nurture: An Interactional Model

Poll #1. What are you???

- A. Teacher, instructor, teacher assistant
- B. Counselor, school psychologist
- C. Curriculum specialist, developer
- D. Instructional designer, technology specialist, multimedia developer
- E. School administrator, principal, head
- F. Government official, policy thinker
- G. Student
- H. Other

Poll #2:

Raise your hands if you are a digital native
(grew up with a computer at home).

Poll #3: What age learners are you interested in?

- a. Ages 1-5
- b. Ages 6-10
- c. Ages 11-15
- d. Ages 16-20
- e. Ages 21+

Poll #4:

What age learners is online
education growing the most in UK?

- a. Ages 1-5
- b. Ages 6-10
- c. Ages 11-15
- d. Ages 16-20
- e. Ages 21+

**Poll #5:
Should kids be allowed to bring mobile phones, MP3 players (iPods) to school?**

MiamiHerald.com

EDUCATION | CLASSROOM | ONLINE
Board OK's flip-flops, but iPods are OFF
 Flip-flops are in for high-arched kids, out for everyone else. Also out: bedroom slippers, unstrapped clothes, iPods and laptops.

**E-learning + Scotland = Major success,
May 21, 2006**

<http://www.sundayherald.com/55719>

"THE school of tomorrow will not be at the end of your street. It will be everywhere, and getting there will only take a click of a mouse. In this vision of the future, every school will have a web portal where the pupils, parents and teaching staff will have the opportunity to interact and share information. In this virtual space, lessons will be beamed direct to anyone who wants to attend, while all the teaching materials required can be downloaded in a trice. Video conferencing will facilitate group interaction while scholars from Tokyo to Tomintoul (Scotland) will log on to their personalised home pages to upload course work, view their marks or receive news about the wider school community."

**Telegraph:

Singapore and Taipei

(Intel Press Release, 2006)

- Singapore, the island city-state in Southeast Asia, is about to complete a major new public/private project that will see large chunks of the 270 square mile city provided with Wi-Fi access by the end of 2008. The entire city, indoors and out, is due to be covered by 2015.
- In the coldest capital in Canada, the city residents of Iqaluit (pop. 6,000) enjoy free wireless from one free hotspot (with two more due soon to cover the suburbs), while Taipei, Taiwan (pop. 2.6 million) has a few more—over 4,000 hotspots that provide coverage for 90 percent of the city.

Effects of interactive multimedia in distance learning

Giti Javidi and Ehsan Sheybani, 2004, In Proceedings of the IASTED International Conference WEB-BASED EDUCATION

"The advancement in technology is shaping every aspect of our life, including education. One decade ago, the Internet was not critical to education. However, now, it has become an integral part of learning process. Internet technology is having a dramatic effect on colleges and universities, producing what may be the most challenging period in the history of higher education."

The Learning World has become Flat!

The Ten Forces that Flattened the Learning World

1. Tools for Searching and Finding Information (e.g., Google, Yahoo!)
2. Rise in Demand for Online Learning
3. Open-Sourcing Learning: Sakai, Moodle, eduCommons
4. Collaboration (e.g., SharePoint, Groove, Word, Interwise, Breeze, Google Talk, Skype)
5. Learning Portability (Podcasting, Mobile technology)
6. Learner Empowerment and Individualization of Learning (Blogs, Wikis, etc.)
7. Online Portals of Information
8. Online Learning Object Repositories (MERLOT, Connexions, Careo, Jorum)
9. Open CourseWare (MIT OCW, Utah State, Johns Hopkins, Japan, CORE, OOPS)
10. Knowledge Brokers and Collectors

Part I. People, Society, and Cultures

Who is demanding online learning?

"YOUNG AND WIRED, Computers, cell phones, video games, blogs, text messages -- how will the sheer amount of time spent plugged in affect our kids?"
 Katherine Seligman, San Fran Chronicle,
 Sunday, May 14, 2006

Classes popular with on-campus students

Friday, January 12, 2006; Posted: 3:18 p.m. EST (20:18 GMT)

(AP) -- Andy Steele lives just a few blocks from the campus of Black Hills State University in Spearfish, South Dakota, so commuting to class isn't the problem. But he doesn't like lectures much, isn't a morning person, and wants time during the day to restore motorcycles.

So Steele, a full-time senior business major, has been taking as many classes as he can from the South Dakota state system's online offerings. He gets better grades and learns more, he says, and

Andy Steele takes an online course in the library at Black Hills State University.

grad-advise@blackhills.edu

Simulation: Xer

- "The skill to be valued in the twenty-first century is not the length of attention span, but the ability to multitask - to do many things well at once.... [and] the ability to process visual information very rapidly." (Rushkoff, 1996:50)

Money

Generation Y: They've arrived at work with a new attitude

By Stephanie Armour, USA TODAY

Generation Y

Learner Control: Xer

- Xers expect a range of options, in terms of what they learn and how they learn it. They require autonomy and flexibility for their own learning. They demand a variety of instructional methods from which they can choose to learn, e.g., videotapes, self-paced modules, interactive CDs.
 - "Online gives me something to do when I'm bored with the professor."
 - "I respect myself more as a self-teacher."
 - Dziuban, Moskal, & Hartman (2005)

Neomillennial Learning Styles

Planning for Neomillennial Learning Styles: Implications for Investments in Technology and Faculty

Chris Dede, Harvard University, *Educause, 2005*

- Fluency in multiple media--value all types of communication, activities, experiences, not a single best medium
- Actively seek, collect, and synthesize experiences, rather than absorb a single best source
- Active learning and collective reflection
- Non-linear and associated webs of learning
- Co-design of learning experiences for individual needs and preferences not pre-customized

CAMPUSMOVIEFEST.COM showcases the collaborative work of tens of thousands of student filmmakers from around the world

**What Students Need to Know:
21st Century Skills and ICT literacy;**
Susan D. Patrick, President and CEO
North American Council for Online Learning

The future will demand people who can express themselves effectively with images, animation, sound, and video, solve real world problems that require processing and analysis of thousands of numbers, evaluate information for accuracy, reliability, and validity; and organize information into valuable knowledge, yet students are not learning these skills in school.

Dual Coding Theory (DCT)

- Dual Coding Theory (DCT), proposed by Paivio in 1972, is a model that is based on Cognitive Information Processing Theory. DCT model assumes that information is processed and stored in memory by two separate, but interconnected systems - one visual, the other verbal. DCT claims that pictures are faster and easier to recall since they are coded in both memory systems and the visual system is continuous and parallel in its organization. Verbal memory, on the other hand, is structured in discrete, sequential units.

Nature and Nurture: An Interactional Model (20 tech trends)

Part I. 20 Technology Trends

Trend #1. Education 2.0: Web-based services and other open technology alternatives is changing the nature of school software.

- Hoping to lure teachers and students, thus capturing the attention of a whole new generation of users, Google--the world's largest internet company--this year launched an online portal for educators, complete with lesson plans and other resources designed to help educators use the company's free online tools (such as Google Docs and Spreadsheets, an open alternative to Microsoft's Word and Excel) in their classes. The site also contains resources for using Google Maps in education, and Google last month ran an online project encouraging students from around the globe to brainstorm ways to slow or stop global warming--using the company's software to collaborate.

1. Online Maps and Videos
(Sergey Brin, Co-Founder)

Use Google Maps Mashups in K-12 Education
By Jeffrey Branzburg, May 15, 2006

<http://www.techlearning.com/story/showArticle.jhtml?articleID=187002846>

- The **Gmaps Pedometer**, for example, can be used to visually map a walking route. The site updates the distance as you add more locations. From 96th Street and 1st Avenue across Central Park to 97th Street and Riverside Drive in Manhattan is 1.8 miles. You can even add a calorie counter. *Suggested activities:* Have your students estimate a distance (for example, from school to home), and use Gmaps Pedometer to check their estimate. For physical education, have students plan a walking program for exercise, then see how many calories their suggested program will burn.

Trend #2. Mobile Technology
All learning in one's own hands?

Cell Phone Dependent

- Debates in schools: cheating, off task, send compromising pictures, socializing, etc.
- 80 percent of the world lives in an area covered by wireless networks (Kirkpatrick, CNN Money, Dec 22, 2006).

Six ed-tech trends to watch in 2007

Gregg W. Downey, Editor,
eSchool News, December 22, 2006

Trend No. 1: The leveling power of the World Wide Web

- No longer need you be a major motion picture studio to create a box-office smash. You don't need a radio station to be a popular disc jockey. You don't need a television network to create a video that can be seen literally by millions.

Trend #3. YouTube co-founders Chad Hurley and Steven Chen.

Trend #10. Visualization Tools: Ancient Rome Virtually

Trend #11. Growth in Collaboration and Virtual Teaming

Trend #12. Skype: Online Voice and Text

Trend #13. The \$100 Laptop

The project aims to build peer-to-peer communications

Negroponte says the new laptop is designed to be kid-friendly

Trend #18. Blogging

Vlogging (Video Blogging)

e.g., Andy Calvin's Waste of Bandwidth

UPnP is a computer network protocol of the audio

March 10, 2006

From: The Global Wifi Network

A video conversation with Andy Calvin, the founder of *Waste of Bandwidth*, at a presentation he gave at the Stanford Business Center on March 9, 2006.

For the global wifi network of individuals ("vloggers") who provide free information with in their neighborhoods. If they choose to offer with for their own business or to make a profit out of it.

For the global wifi network of individuals ("vloggers") who provide free information with in their neighborhoods. If they choose to offer with for their own business or to make a profit out of it.

Educational use of Blogs

<p>For instructors</p> <ul style="list-style-type: none"> Professional practice Networking and knowledge sharing Course management tool ... 	<p>For students</p> <ul style="list-style-type: none"> Reflections or journals Dialogue with peers Group work Communicate with instructor ...
--	---

Blogging Questions

- Who has a blog? Any for a specific class?
- Who regularly reads other people's blogs?
- Who assigns blogging tasks?
- Who has created a video blog?
- Who thinks it is an utter waste of time to blog?

Adventure Blogging = Reality Teaching and Learning

(Ben Saunders, Mark Fennell)

the arctic north pole expedition (2003)

Ben Saunders

the arctic north pole expedition (2003)

Trend #19. Wikis

WIKIPEDIA

Wikipedia is a free, online, multi-language, multi-directional encyclopedia. It is a project of the Wikimedia Foundation.

Wikipedia is a free, online, multi-language, multi-directional encyclopedia. It is a project of the Wikimedia Foundation.

Wikis

Sanssouci

Wikis

Sanssouci

Debates about Wiki Quality

For Teachers New to Wikis

- Wikis are free, online writing spaces.
- Wikis use simple formatting rules, so no HTML understanding required.
- Highly collaborative composing and creativity
- Authors do not claim ownership
- Published online
- Wikis provide a history and anyone can revisit prior versions of text

How use in teaching

1. Provide space for free writing
2. Debate course topics and readings
3. Share resources (websites, conferences, writing, etc.)
4. Maintain group progress journal
5. Require group or class essay
6. Have student revise Wikipedia pages
7. Write a wikibook

Wiki Questions

1. Who regularly reads Wikipedia articles just for fun?
2. Who regularly reads Wikibooks?
3. Who seeks Wikipedia for content?
4. Who has edited or written new articles on Wikipedia or Wikibooks?
5. Who thinks it is ok for college students to cite from Wikipedia?

Sample Junior Book (Dinosaurs) http://en.wikibooks.org/wiki/Main_Page

Wikijunior Dinosaurs/Apatosaurus

From Wikipedia, the free encyclopedia

Happy New Year, Everyone!

For the past year the great encyclopedia on Wikipedia is Wikibooks!

What did they look like?

The Apatosaurus was one of the largest land animals that ever lived. They were 20-25 meters in length, 2.5 meters in height and weighed as much as 25,000 tonnes! This is about 5 times heavier than the largest elephant.

What did they eat?

They were herbivores. That is, they ate plants. They used their long necks to reach up into high trees to get some extra leaves. Because they ate so much just chewing the food was not enough for them. So some scientists think that they produced stipes to help grind the food in their stomachs!

Trend #20. Podcasting, Webcasting, and Coursecasting (Adam Curry; www.dailysourcecode.com)

Brandon Hall, Chief Learning Officer Magazine, July 2006

"Podcasts provide a way to distribute an audio or video episode via the Internet for playback at any time on any MP3 device or PC. Podcasts allow training in the form of event capture, new product information, sales tips, orientation, etc. to be delivered on a just-in-time, just-enough basis to anyone anywhere."

Podcasting

The quality of some of the podcasts I have listened to is certainly as good as many supposedly professional radio stations

Podcast Questions

1. Who has listened to a podcast?
2. Who listens to a certain podcast on a regular basis?
3. Who has created a podcast?
4. Who has created a vodcast?
5. Who thinks podcasting is simply more talking heads?

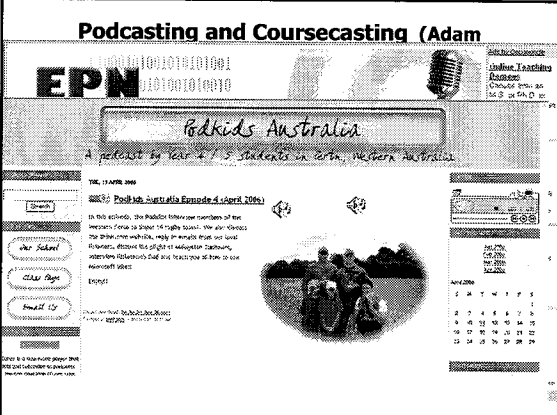

Webcasts: WorldBridges Goals

What is Worldbridges?

- Worldbridges is a network of individuals and organizations that use live, interactive webcasting and other new media technologies to help people connect, learn, & collaborate. (Webheads, Koreabridge, Worldbridges Tibet, EdTechTalk, etc.)

Goals & Values

- Our primary goal is to foster understanding and cooperation amongst the citizens of the world. We value civility and respect, open source collaboration, fair distribution of income, and a sense of world identity.

Podcasting and Coursecasting (Adam)

EPN

Podkids Australia
A podcast by Year 4 / 5 students in Perth, Western Australia

THE 11th EPN 2006
Podkids Australia Episode 4 (April 2006)

In this episode, the Podkids bring you a series of fun interviews from a Super 14 rugby game. We also discuss the Olympic medals, why it's a great idea to have a mascot, and how to get involved in the Olympic Games. We also have a special interview with the Olympic mascot, a kangaroo named Wally.

Enjoy!

Podkids Australia
www.podkids.com.au

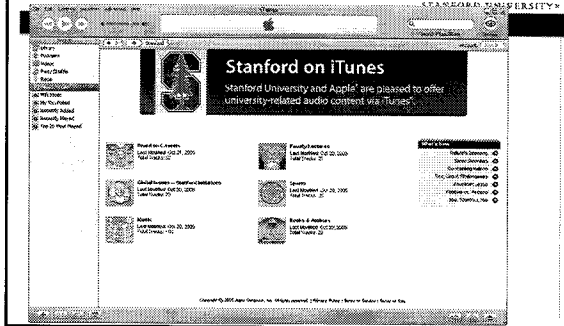

Art and History Exhibits

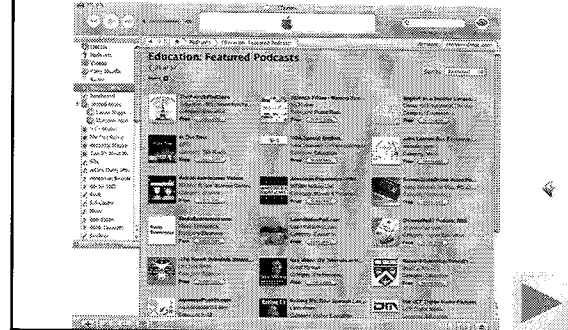

Personal music players: An artwork in progress

Podcasting <http://itunes.stanford.edu/>

Listen: iTunes, PodcastAlley

Educational Applications of Podcasting

1. Recordings of lectures (Coursecasting)
2. Supplemental textbook or entire book
3. Student projects
4. Interviews
5. Language lessons
6. Oral reports
7. K-12 classroom interactions
8. Downloadable library of resources
9. Recordings of performances

10 Trends

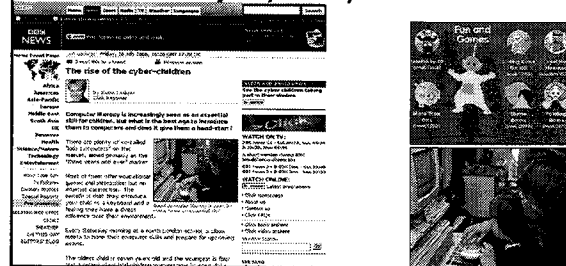

- From: Bonk, C. J., & Kim, K. J. (in press). **Future directions of blended learning in higher education and workplace learning settings.** To appear in C. J. Bonk & C. R. Graham (Eds.). *Handbook of blended learning: Global Perspectives, local designs.* San Francisco, CA: Pfeiffer Publishing.

Personal Learning Environments: Challenging the dominant design of educational systems

Scott Wilson, Prof. Oleg Librin, Mark Johnson, Phil Beauséjour, Paul Shapiro & John Milligan, University of Bolton
Blending Learning and Work

06)

FIGURE 34.1. PAST, PRESENT, AND FUTURE OF BLENDED LEARNING.

Trend #1. Mobile Learning

- Increasing use of mobile and handheld will create rich and exciting new avenues for learning. Teachers can deliver instruction and participate in class from more locations.

Trend #2. Greater Visualization, Individualization, and Hands-on Learning

- Online and FTF learning environments will increasingly become individualized; in particular, emphasizing visual and hands-on activities.

Trend #3. Self-Determined Learning

- ICT will foster greater student responsibility for learning. Decisions about the type and format of blended learning will be made by students instead of instructors or instructional designers. Learners will be designing their own programs and degrees.

Trend #4. Student Expectations Rise

- Students will be used to having more choices and selections so their expectations will rise as do the expectations of their parents.

Trend #5. Personalized Learning Environments

- There will be increasing focus on providing the learner with what he or she needs and wants with the growth of personalized learning environments (PLEs) during the coming decade.

Personalized Learning Environments (Mark Johnson et al., University of Bolton, 2006)

- Web 2.0 technologies including social networking software, weblogging, Wikis, personal publishing, authoring tools, tools for collaboration (e.g., Writely), news aggregators
- Other tools include calendaring and scheduling tools, email, chat and instant messaging.

Personalized Learning Environments (Mark Johnson et al., University of Bolton, 2006)

- **Context**—providing a preferred context for learning.
- **Conversation patterns**—supporting conversations in learning and moderating that learning
- **Team**—helping connect one to others who share similar learning interests.
- **Activities**—matching one's learning activities to one's learning preferences.
- **Social events**—matching people for learning events based on personal profiles, preferences, and contacts.
- **Technology**—making tools available that prefer.

Personalized Learning Environments

- Providing learning paths for students.
- Offering portfolios that stay with learner—showcases work.
- Students select from a range of learning environments, courses, and instructors.
- Learner cohorts are made up of students from various countries of choice.
- Age grouping is less relevant and instead a push for more learning by interest, knowledge, and experiences.
- Instructor will be on display for learner selection.

What is the Web 2.0?

What Is Web 2.0
Design Patterns and Services Models for the Next Generation of Software
by Ian Harte
Dr. J. K. O'Neil

In our initial brainstorming, we formulated our sense of Web 2.0 by example:

Web 1.0		Web 2.0
DoubleClick	-->	Google AdSense
Ofoto	-->	Flickr
Akamai	-->	BitTorrent
mp3.com	-->	Napster
Britannica Online	-->	Wikipedia
personal websites	-->	blogging
evite	-->	upcoming.org and EVDB
domain name speculation	-->	search engine optimization
page views	-->	cost per click
screen scraping	-->	web services
publishing	-->	participation
content management systems	-->	wikis
directories (taxonomy)	-->	tagging ("folksonomy")
stickiness	-->	syndication

Personalized Learning Environments

- Access to experts for apprenticeship
- School no longer over when leave premises; in a virtual school, learn all the time.
- Internet provides video on demand and at low cost
- Teachers rotate among groups of students to provide their expertise where and when needed

Trend #6. Increased Connectedness, Community, and Collaboration

- **ICT will open new avenues for collaboration, community building, and global connectedness. It will become used as a tool for global understanding and appreciation.**

**Trend #7.
Increased Authenticity and On-Demand Learning**

- Online learning will focus on authenticity and real world experiences to supplement, extend, enhance, and replace formal learning. As this occurs, blended learning will fuel advancements in the creation and use of online case-learning, scenarios, simulations and role play, and problem-based learning.

**Trend #8.
Linking Work and Learning**

- As blended learning proliferates, the lines between workplace learning and formal learning will increasingly blur. Higher education degrees will have credits from the workplace and even credit for work performed.

**Trend #9.
Less Predefined Schedules**

- When teachers are teaching and students are learning is less clear. New norms and measurement scales will emerge.

**Trend #10.
Changed Instructor Roles**

- The role of an instructor or trainer in a blended environment will shift to one of mentor, coach, and counselor.

A Final Quote:

It's a long, long road...
With many a winding turn.
That leads us to who knows where?...

It's a long, long road
From which there is no return
While we're on the way to there
Why not share

(The Hollies, 1969; He Ain't Heavy,
He's My Brother; B. Scott - B. Russell)
